PROJECT HIGHLIGHT

BDE teamed with WEG Transformer and Helios to provide a reliable permanent power installation for a major government customer.

The team implemented design, installation and commissioning of a 750kVA padmount transformer for the FBI Training Facility Maintenance Yard. Contracted directly with the Federal Government to remove existing transformer, design/install a new transformer to fit over the existing conduit and reconnect existing ATS in an 8 hour outage timeframe. Installation was completed by BDE with zero impact to the FBI's facility operations.

FBI TRAINING FACILITY PADMOUNT TRANSFORMER INSTALLATION (QUANTICO, VA)
